Chantal Marissa Pande

Software Engineer | Full-Stack Development | AI and Product Development

chantalpande123@gmail.com +254 793 276 421 Nairobi, Kenya Portfolio website

LinkedIn profile GitHub profile

Profile Summary

Software Engineering graduate with hands-on experience in full-stack development, REST API integration, database-driven applications, UI/UX design, and enterprise technology environments. Experienced in developing customer-facing digital products and contributing to technology research, requirements analysis, prototyping, and product development.
Skilled in Java, Python, JavaScript, Angular, React, Django REST Framework, Node.js, PostgreSQL, Firebase, and API development, with additional exposure to Kotlin, Spring Boot, cloud platforms, Generative AI, Agile development, and CI/CD practices. Previous experience includes software product development at Eclectics International and enterprise technology strategy and planning at KCB Group.

Professional Experience

Technical Business Analyst - Intern, *RiverCross Tracking Limited* 10/2026 – Present
Nairobi, Kenya

- Support business requirements analysis by identifying operational needs, documenting system requirements, and aligning technical solutions with business objectives.
- Participate in software quality assurance and testing, including identifying, documenting, and reporting system defects.
- Explore AI and automation opportunities to improve operational efficiency, streamline workflows, and support business processes.
- Provide analytical support through data interpretation, problem-solving, and evaluation of business operations.
- Contribute to process improvement initiatives through technical documentation, workflow analysis, and recommendations for system enhancements.
- Collaborate with technical and business operations teams to support product understanding, system improvements, and effective solution delivery.

Software Development Intern - Products, Research and Development, 08/2026 – 09/2026
Eclectics International Nairobi, Kenya

- Researched technologies and frameworks for web and mobile development, financial dashboards, data visualization, and API integration to support project architecture and technology selection.
- Proposed SmartEntry, a visitor management and security platform, researching its architecture, technology stack, and deployment options during the project-selection phase.
- Contributed to the development of SM-Intelligence, a financial management platform designed to help business owners consolidate accounts, monitor cash flow, manage budgets, and analyze financial information.
- Developed customer-facing frontend features for SM-Intelligence using Angular, including registration, login, onboarding, dashboard, accounts, transactions, cash flow, budgets, analysis, reports, notifications, and settings.
- Designed UI/UX prototypes in Figma for authentication, onboarding, landing, and dashboard interfaces, applying financial dashboard design and usability principles.

- Worked within a broader technology architecture incorporating Angular, Kotlin, Java/Spring Boot, and PostgreSQL across web, mobile, backend, and database components.
- Collaborated with the project team using Git/GitHub for version control and Linear for task tracking while participating in requirements and technical discussions.

Technology Division Intern, *KCB Group* 01/2026 – 04/2026
Department of Strategies, Planning and communications in the Technology Division. Nairobi, Kenya

- Collaborated with cross-functional stakeholders to support enterprise technology initiatives within KCB's Technology Division.
- Analysed business workflows and contributed recommendations to improve operational efficiency.
- Participated in technology planning discussions by gathering information from technical and business teams.
- Assisted in documenting technology initiatives and communicating project updates across stakeholders.
- Gained exposure to enterprise APIs, cloud platforms (Azure and AWS), fintech infrastructure, and digital transformation programmes.

Event Organizer, *SEED Global Education* 07/2024 – 07/2025

- Marketed events remotely, increasing attendance by 50% (from 1000 expected to 1500-1800 attendees).
- Assisted over 200+ participants with registration and database entry.
- Improved event success, leading to repeat sessions due to high turnout.

Volunteer, *Education USA* 09/2025 – 10/2025

- Guided and organized flow for 7000+ event attendees, including undergraduate to PhD aspirants.
- Supported representatives from Rutgers University, assisting in registering 2500+ prospective students.
- Part of the team that successfully ushered the US Ambassador during the event.

AI experience

- Use Generative AI tools including ChatGPT, Claude, and GitHub Copilot to support software development, debugging, documentation, research, and design.
- Experienced with prompt engineering and AI-assisted development workflows.
- Conducted technology research, software requirements gathering, literature reviews, and technical evaluations for software development projects.
- Applied user feedback and Human-Computer Interaction principles during iterative product development.

Research experience

- Conducted software requirements gathering.
- Performed literature reviews for university software engineering projects.
- Evaluated user feedback during iterative development.
- Applied Human Computer Interaction principles to interface design.

Skills

Technical skills

- Programming Languages: Java, Python, JavaScript, SQL
- Frontend: React, HTML5, CSS3, Bootstrap, Vite.
- Backend and APIs: Django, Django REST Framework, Node.js, Express.js, Flask, REST APIs, JWT Authentication.
- Databases: PostgreSQL, MySQL, Firebase Firestore, Relational Database Design.
- Development Tools: Git, GitHub, Figma, Docker, Google Colab, Android Studio, VS Code, Postman.

Programming Languages:
Java, Python, JavaScript, SQL.

Frontend Development:
Angular, React, HTML5, CSS3, Bootstrap, Vite.

Backend and APIs:
Django, Django REST Framework, Node.js, Express.js, Flask, REST APIs, JWT Authentication.

Databases:
PostgreSQL, MySQL, Firebase Firestore, Relational Database Design.

Mobile Development:
Kotlin, Android Studio, Capacitor.

Development Tools:
Git, GitHub, Postman, VS Code, Figma, Docker, Linear, Google Colab.

Cloud and Deployment:
AWS, Microsoft Azure, Google Cloud, Render, Vercel, Cloud Deployment Fundamentals.

Data and Analytics:
Pandas, NumPy, Excel, Data Visualization.

Development Practices:
Object-Oriented Programming, Agile Methodologies, Git Workflows, Testing and Debugging, CRUD Operations, CI/CD Fundamentals, Secure Coding Fundamentals.

AI and Product Development:
Generative AI, Prompt Engineering, AI-Assisted Development, Requirements Gathering, User Research, Usability Testing, Human-Computer Interaction, Product Thinking.

Projects

SmartEntry, *Visitor & Security Management Platform*
Django REST Framework | JavaScript | Vite | Bootstrap | PostgreSQL | JWT

- Developed a full-stack visitor and security management platform for organizational access and security workflows.
- Implemented JWT-based authentication and functionality for visitor management, incidents, notifications, reporting, analytics, and user administration.
- Built REST API endpoints using Django REST Framework and integrated frontend functionality using Axios.
- Designed the application around modular backend services for users, visitors, incidents, reports, notifications, and dashboard functionality.
- Applied role-based system access and database-backed management of operational information.

Otaku254, *AI-Powered Community Platform*
React | TypeScript | Firebase | Firestore | Generative AI

- Developed a full-stack community and content platform centered around anime, manga, K-pop, and pop culture.

- Implemented Firebase authentication and Firestore-powered content, comments, user profiles, and personalized preferences.
- Integrated an AI chatbot for conversational content discovery and user interaction.
- Adapted the web application for Android using Capacitor and Android Studio.

Ex-change, *Skill Exchange Platform*
Built a full-stack platform comprising 20+ REST API endpoints supporting authentication, messaging, skill listings, analytics and recommendations.
- Conducted usability testing with students to identify pain points.
- Iteratively improved workflows based on user feedback.
- Designed secure authentication and real-time messaging.
- Worked through debugging sessions informed by observed user behaviour.

E-shamba, *Agricultural Marketplace Platform*
React, Vite, Django REST Framework, PostgreSQL, Bootstrap
- Developed a full-stack web platform connecting Kenyan farmers with vendors and markets to improve produce market access and supply-chain linkages.
- Implemented role-based functionality for farmers, vendors, and administrators, including produce management, vendor browsing and ordering, and administrative approvals.
- Designed and integrated a PostgreSQL relational database for managing users, produce listings, and orders through a Django REST backend.
- Built responsive dashboards and interfaces for different user roles using React and Bootstrap, with Git/GitHub for version control.

🎓 Education

BSc. Software Engineering, *United States International University - Africa* 2022 – 2026
Relevant Coursework:
- Software Engineering.
- Database Systems.
- Cloud Computing.
- Machine Learning.
- Human Computer Interaction.
- Agile Project Management.

KCSE | Mean Grade: B, *Moi High School Kabarak* 2018 – 2022

★ Achievements & Volunteering

Community Service, *(Karura Health Center, 2025):*
Assisted in managing patient flow and supporting staff in an understaffed environment.

Environmental Conservation
Participated in afforestation projects in Nairobi, contributing to land rehabilitation.

Volunteer, *(The Nest):*
Cared for abandoned children and young mothers, providing social and emotional support.
